PROFESSIONAL
EXPERIENCE

Yale University New Haven, CT

Research Associate 2016 - present

Research Assistant 2011 - 2016

Working on CertiKOS, an extensible architecture for building certified OS kernels. As the key developer of the project, verified a series of sequential and concurrent OS kernels in Coq with my Yale colleagues. The most realistic one is written in 6,500 lines of C and x86 assembly and runs on stock x86 multicore machines.

Tsinghua University Beijing, China

Research Assistant Spring 2011

Working on verifying the preemptive scheduling and nested interrupt handling of μC/OS-II.
